MC400 Modular Modem

The MC400 Modular LTE Modem combines enterprise reliability with Gigabit-Class LTE performance. Cradlepoint MC400-capable sites, vehicle, and IoT routers can be easily upgraded to include industry-leading capabilities such as dual modems and LTE Advanced Pro.

Provide more usable bandwidth for burst or peak usage by adding the MC400 Modular Modem to a Cradlepoint router.

Deploy multiple wireless backup connections to help reach 99.99% uptime.

Each modem includes two SIM slots for even more data plan diversity options.

Features:

— Offers second modem capability

— Dual SIM slots in each modem

— GPS support

— Support for public safety networks and Band 14

— Support for Gigabit-Class LTE Advanced Pro

Key Benefits:

— Higher availability: Insert an MC400 to add a second active LTE link for primary and failover connectivity

— Ultimate WAN Diversity™: Combine LTE with dual-modem, dual-SIM, and multi-carrier functionality; Ethernet; and/or Wi-F as WAN

— Flexibility: Auto-switch SIM cards when you've reached your data plan cap

— Future-proof your network: Field upgrade existing routers to the latest modem technology

— Locate assets: GPS with support for CAD and fleet management, ensures vehicles can always be located
